

HTML Assignment #4 – Creating a Mini Portfolio with Links and Images

Scenario:

You are building a **personal portfolio website**.

The goal is to create **two simple web pages** connected to each other using links, and include images with proper format and size.

You also want to allow people to **visit your social profile** and **contact you by email**.

What You Will Learn in This Assignment:

- How to create links between pages
 - How to link to other websites
 - How to create email links
 - How to add images
 - Which image formats to use (.jpg, .png, .gif)
 - How to use small-sized images for faster loading
-

Requirements:

Page 1: `index.html`

This is your **Home Page**. It should include:

- A **main heading**: Welcome to My Portfolio
 - A **short paragraph** about yourself
 - A **link to the second page** (projects page):
Example: [See My Projects]
 - A **link to an external site**, e.g., your favorite website:
 - An **email link** with your email address:
When clicked, it should open the default mail app
Example: Contact me: yourname@email.com
-

Page 2: `projects.html`

This is your **Projects Page**. It should include:

- A **heading**: `My Projects`
 - At least **one image** of a project you've made or like
 - Use a `.jpg` or `.png` image
 - Make sure the image size is **not too large** (optimize it for web use)
 - Add `alt` text to describe the image
 - A **link back to the home page** (`index.html`)
-

Instructions:

- Create a new folder: `html-assignment-4`
 - Inside the folder, add:
 - `index.html`
 - `projects.html`
 - One image file (inside a folder named `images/`)
 - Make sure both pages are linked correctly
 - Open and test both pages in the browser (use Copy Path method)
-

What You Will Practice:

- Creating and linking multiple pages
- Linking to external websites and email
- Adding and formatting images
- Understanding image formats and optimization
