

HTML Assignment #2 – Simple Web Page for a Client

Scenario:

You got your **first mini-project** from a client.

The client is a **school teacher** who wants a simple web page to introduce a **Science Chapter**.

Your job is to create this web page using the HTML tags you have learned.

Client Requirements:

1. **Page Title** should be: Science Chapter Introduction
 2. On the web page, display the following:
 - A **main heading** (<h1>) that says:
Welcome to Science Class
 - A **paragraph** that introduces the topic:

"This chapter is about the Solar System. We will explore planets, stars,
and other space objects."
 - A **bold** sentence:
Learning science is fun!
 - An **italic** sentence:
Stay curious and keep exploring.
 - A **horizontal line** to separate sections.
 - A **sub-heading** (<h2>) that says:
Some Fun Facts
 - A paragraph with:
 - Superscript example: Water boils at 100^oC
 - Subscript example: Chemical formula of water is H₂O
 - Use a **line break** (
) in the above paragraph to separate both facts on different lines.
-

Instructions:

- Create a new folder: html-assignment-2
 - Inside it, create a file: index.html
 - Add the content based on the client's requirement using proper HTML tags
 - Open the file in your browser (Right click → Copy Path → Paste in browser)
-

What You Will Practice:

- Writing client-style instructions
- Using text formatting tags (, <i>)
- Headings and paragraphs
- Using <sup>, <sub>,
, and <hr>
- Structuring content in a clean and readable format
