

HTML Assignment #1 – My First Web Page

What You Have Learned So Far:

- How to create a file in VS Code
 - Basic structure of an HTML page
 - Heading tags (<h1> to <h6>)
 - Paragraph tag (<p>)
-

Assignment Instructions:

1. **Create a New Folder**
 - Name it: `html-assignment-1`
 2. **Inside the Folder:**
 - Create a new file and name it: `index.html`
 3. **Open the file in VS Code**
 4. **Write an HTML Page with the Following:**
 - Add the basic structure of an HTML page
 - Add a **main heading** with your name (use biggest heading)
 - Write a **paragraph** about yourself (why you're learning HTML, etc.)
 - Add some **headings from <h2> to <h6>** with anything you want like hobbies, favorite food, etc.
 5. **Open the Web Page in Browser**
 - Right-click on the `index.html` file
 - Click on **“Copy Path”**
 - Paste that path into the browser address bar and press **Enter**
-

What You Will Practice:

- Creating an HTML file
- Writing and understanding structure
- Using headings and paragraphs
- Viewing your webpage in the browser
